

[Atc Simulator 2 Instruction Manual](#)

The screenshot displays the Atc Simulator 2 interface. On the left, a flight information table lists various aircraft with their call signs, destinations, altitudes, and speeds. The main area is a radar display showing a complex network of flight paths and aircraft positions. A 'CommandsWindow' is open in the bottom-left corner, showing a list of commands for aircraft ABC123, including heading, altitude, and speed instructions. The top of the interface shows the airport 'PARIS/ORLY' at 291 ft AMSL, with wind information and a time elapsed of 00:06:11. The bottom of the interface includes a 'Send' button, a simulation rate of 1.0x, and 'Pause' and 'Step back' buttons.
